

## SSA-321292: Denial of Service in the OPC Foundation Local Discovery Server (LDS) in Industrial Products

Publication Date: 2022-05-10  
 Last Update: 2022-05-10  
 Current Version: V1.0  
 CVSS v3.1 Base Score: 7.5

### SUMMARY

A vulnerability has been identified in the OPC Foundation Local Discovery Server (LDS) [0] of several industrial products. The vulnerability could cause a denial of service condition on the service or the device.

Siemens has released updates for several affected products and recommends to update to the latest versions. Siemens is preparing further updates and recommends specific countermeasures for products where updates are not, or not yet available.

### AFFECTED PRODUCTS AND SOLUTION

Affected Product and Versions	Remediation
SIMATIC NET PC Software V14: All versions < V14 SP1 Update 14	Update to V14 SP1 Update 14 or later version <a href="https://support.industry.siemens.com/cs/ww/en/view/109807351/">https://support.industry.siemens.com/cs/ww/en/view/109807351/</a> See further recommendations from section <a href="#">Workarounds and Mitigations</a>
SIMATIC NET PC Software V15: All versions	Currently no fix is planned See recommendations from section <a href="#">Workarounds and Mitigations</a>
SIMATIC NET PC Software V16: All versions	Currently no fix is planned See recommendations from section <a href="#">Workarounds and Mitigations</a>
SIMATIC NET PC Software V17: All versions < V17 SP1	Update to V17 SP1 or later version <a href="https://support.industry.siemens.com/cs/ww/en/view/109808270/">https://support.industry.siemens.com/cs/ww/en/view/109808270/</a> See further recommendations from section <a href="#">Workarounds and Mitigations</a>
SIMATIC Process Historian OPC UA Server: All versions < 2020 SP1	Update to Version 2020 SP1 or later version For PCS neo: Update to PCS neo V3.1 SP1 ( <a href="https://support.industry.siemens.com/cs/ww/de/view/109807752/">https://support.industry.siemens.com/cs/ww/de/view/109807752/</a> ) For PCS 7: Update to PCS 7 V9.1 SP1 ( <a href="https://support.industry.siemens.com/cs/ww/en/view/109805073/">https://support.industry.siemens.com/cs/ww/en/view/109805073/</a> ) For WinCC: contact local support See further recommendations from section <a href="#">Workarounds and Mitigations</a>

SIMATIC WinCC: All versions	Currently no fix is available See recommendations from section <a href="#">Workarounds and Mitigations</a>
SIMATIC WinCC Runtime Professional: All versions	Currently no fix is available See recommendations from section <a href="#">Workarounds and Mitigations</a>
SIMATIC WinCC Unified Scada Runtime: All versions	Currently no fix is available See recommendations from section <a href="#">Workarounds and Mitigations</a>
TeleControl Server Basic V3: All versions	Currently no fix is available See recommendations from section <a href="#">Workarounds and Mitigations</a>

## **WORKAROUNDS AND MITIGATIONS**

Siemens has identified the following specific workarounds and mitigations that customers can apply to reduce the risk:

- Deactivate the OPC LDS Service if supported by the product use case. The LDS service is not activated in the default configuration
- Use VPN for protecting network communication between cells

Product specific remediations or mitigations can be found in the section [Affected Products and Solution](#).

Please follow the [General Security Recommendations](#).

## **GENERAL SECURITY RECOMMENDATIONS**

As a general security measure, Siemens strongly recommends to protect network access to devices with appropriate mechanisms. In order to operate the devices in a protected IT environment, Siemens recommends to configure the environment according to Siemens' operational guidelines for Industrial Security (Download: <https://www.siemens.com/cert/operational-guidelines-industrial-security>), and to follow the recommendations in the product manuals.

Additional information on Industrial Security by Siemens can be found at: <https://www.siemens.com/industrialsecurity>

## **PRODUCT DESCRIPTION**

SIMATIC NET PC software is a software product that is sold separately and implements the communications product from SIMATIC NET.

SIMATIC Process Historian is the long term archive system for SIMATIC PCS 7, SIMATIC WinCC and SIMATIC PCS neo. It stores process values, alarms and batch data of production plants in its database and offers historical process data to reporting and visualization applications.

SIMATIC WinCC is a supervisory control and data acquisition (SCADA) system.

SIMATIC WinCC Runtime Professional is a visualization runtime platform used for operator control and monitoring of machines and plants.

SIMATIC WinCC Unified Scada Runtime is the new visualization runtime platform used for operator control and monitoring of machines and plants.

TeleControl Server Basic allows remote monitoring and control of plants.

## **VULNERABILITY CLASSIFICATION**

The vulnerability classification has been performed by using the CVSS scoring system in version 3.1 (CVSS v3.1) (<https://www.first.org/cvss/>). The CVSS environmental score is specific to the customer's environment and will impact the overall CVSS score. The environmental score should therefore be individually defined by the customer to accomplish final scoring.

An additional classification has been performed using the CWE classification, a community-developed list of common software security weaknesses. This serves as a common language and as a baseline for weakness identification, mitigation, and prevention efforts. A detailed list of CWE classes can be found at: <https://cwe.mitre.org/>.

### **Vulnerability CVE-2021-40142**

In OPC Foundation Local Discovery Server (LDS) before 1.04.402.463, remote attackers can cause a denial of service (DoS) by sending carefully crafted messages that lead to Access of a Memory Location After the End of a Buffer.

CVSS v3.1 Base Score	7.5
CVSS Vector	<b>CVSS:3.1/AV:N/AC:L/PR:N/UI:N/S:U/C:N/I:N/A:H/E:P/RL:O/RC:C</b>
CWE	CWE-119: Improper Restriction of Operations within the Bounds of a Memory Buffer

## **TERMS OF USE**

Siemens Security Advisories are subject to the terms and conditions contained in Siemens' underlying license terms or other applicable agreements previously agreed to with Siemens (hereinafter "License Terms"). To the extent applicable to information, software or documentation made available in or through a Siemens Security Advisory, the Terms of Use of Siemens' Global Website ([https://www.siemens.com/terms\\_of\\_use](https://www.siemens.com/terms_of_use), hereinafter "Terms of Use"), in particular Sections 8-10 of the Terms of Use, shall apply additionally. In case of conflicts, the License Terms shall prevail over the Terms of Use.
