SSA-434032: Vulnerability in Mentor Nucleus Networking Module

Publication Date: 2019-11-12
Last Update: 2019-11-12
Current Version: V1.0
CVSS v3.0 Base Score: 7.1

SUMMARY

Mentor Nucleus by Mentor, a Siemens Business, is affected by one vulnerability. This vulnerability could allow an attacker to affect the integrity and availability of the device.

AFFECTED PRODUCTS AND SOLUTION

<table>
<thead>
<tr>
<th>Affected Product and Versions</th>
<th>Remediation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Nucleus NET: All versions</td>
<td>See recommendations from section Workarounds and Mitigations or upgrade Nucleus ReadyStart and apply the corresponding patch.</td>
</tr>
<tr>
<td>Nucleus RTOS: All versions</td>
<td>See recommendations from section Workarounds and Mitigations or upgrade Nucleus ReadyStart and apply the corresponding patch.</td>
</tr>
<tr>
<td>Nucleus ReadyStart for ARM, MIPS, and PPC: All versions &lt; V2017.02.2 with patch “Nucleus 2017.02.02 Nucleus NET Patch”</td>
<td>Upgrade to V2017.02.2 and install the patch “Nucleus 2017.02.02 Nucleus NET Patch” Updated firmware versions can be obtained from Mentor supportcenter: <a href="https://support.mentor.com/en/product/1009925838/downloads">https://support.mentor.com/en/product/1009925838/downloads</a></td>
</tr>
<tr>
<td>Nucleus SafetyCert: All versions</td>
<td>Nucleus SafetyCert is non affected since it leverages the LWNET stack which is not affected. The Nucleus SafetyCert bundle however, does include a copy of Nucleus ReadyStart to allow easier prototyping, which is affected as noted above.</td>
</tr>
<tr>
<td>Nucleus Source Code: All versions</td>
<td>See recommendations from section Workarounds and Mitigations</td>
</tr>
<tr>
<td>VSTAR: All versions</td>
<td>Contact customer support to receive patch and update instructions.</td>
</tr>
</tbody>
</table>

WORKAROUNDS AND MITIGATIONS

Siemens has identified the following specific workarounds and mitigations that customers can apply to reduce the risk:

- Avoid using DHCP Client of Nucleus NET

GENERAL SECURITY RECOMMENDATIONS

As a general security measure, Siemens strongly recommends to protect network access to devices with appropriate mechanisms. In order to operate the devices in a protected IT environment, Siemens
recommends to configure the environment according to Siemens’ operational guidelines for Industrial Security (Download: https://www.siemens.com/cert/operational-guidelines-industrial-security), and to follow the recommendations in the product manuals.

Additional information on Industrial Security by Siemens can be found at: https://www.siemens.com/industrialsecurity

PRODUCT DESCRIPTION

The Nucleus RTOS provides a highly scalable micro-kernel based real-time operating system designed for scalability and reliability in systems spanning the range of aerospace, industrial, and medical applications.

Nucleus NET module incorporates a wide range of standard-compliant networking and communication protocols, drivers, and utilities to deliver full-featured network support in any embedded device. The networking functionality is fully integrated into the Nucleus RTOS and supports a variety of processors and MCUs.

VSTAR is a complete AUTOSAR 4 based ECU solution providing the tools and embedded software for on-time product deployment. The VSTAR implementation enables scalable support from resource limited small ECUs to powerful multi core solutions. The VSTAR modules developed according to ISO 26262 requirements can be used to address up to and including ASIL D use-cases.

VULNERABILITY CLASSIFICATION

The vulnerability classification has been performed by using the CVSS scoring system in version 3.0 (CVSS v3.0) (https://www.first.org/cvss/). The CVSS environmental score is specific to the customer’s environment and will impact the overall CVSS score. The environmental score should therefore be individually defined by the customer to accomplish final scoring.

Vulnerability CVE-2019-13939

By sending specially crafted DHCP packets to a device, an attacker may be able to affect availability and integrity of the device. Adjacent network access, but no authentication and no user interaction is needed to conduct this attack.

At the time of advisory publication no public exploitation of this security vulnerability was known.

CVSS v3.0 Base Score 7.1

ACKNOWLEDGMENTS

Siemens thanks the following parties for their efforts:

• Armis for reporting the vulnerability.
• The Cybersecurity and Infrastructure Security Agency (CISA) for coordinated disclosure.

TERMS OF USE

Siemens Security Advisories are subject to the terms and conditions contained in Siemens’ underlying license terms or other applicable agreements previously agreed to with Siemens (hereinafter “License Terms”). To the extent applicable to information, software or documentation made available in or through a Siemens Security Advisory, the Terms of Use of Siemens’ Global Website (https://www.siemens.com/terms_of_use, hereinafter “Terms of Use”), in particular Sections 8-10 of the Terms of Use, shall apply additionally. In case of conflicts, the License Terms shall prevail over the Terms of Use.
