

SSA-661034: Incorrect Permission Assignment in Multiple SIMATIC Software Products

Publication Date: 2021-07-13
Last Update: 2021-07-13
Current Version: V1.0
CVSS v3.1 Base Score: 7.3

SUMMARY

Multiple SIMATIC software products are affected by a vulnerability that could allow an attacker to change the content of certain metafiles and subsequently manipulate parameters or behaviour of devices configured by the affected software products.

Siemens has released an update for the SIMATIC STEP 7 V5.X and recommends to update to the latest version. Siemens is preparing further updates and recommends specific countermeasures for products where updates are not, or not yet available.

AFFECTED PRODUCTS AND SOLUTION

Affected Product and Versions	Remediation
SIMATIC PCS 7 V8.2 and earlier: All versions	See recommendations from section Workarounds and Mitigations
SIMATIC PCS 7 V9.X: All versions	See recommendations from section Workarounds and Mitigations
SIMATIC PDM: All versions	See recommendations from section Workarounds and Mitigations
SIMATIC STEP 7 V5.X: All versions < V5.7	Update to V5.7 or later version https://support.industry.siemens.com/cs/de/en/view/109794088/
SINAMICS STARTER (containing STEP 7 OEM version): All versions	See recommendations from section Workarounds and Mitigations

WORKAROUNDS AND MITIGATIONS

Siemens has identified the following specific workarounds and mitigations that customers can apply to reduce the risk:

- Restrict access on the engineering station to trusted users only

GENERAL SECURITY RECOMMENDATIONS

As a general security measure, Siemens strongly recommends to protect network access to devices with appropriate mechanisms. In order to operate the devices in a protected IT environment, Siemens recommends to configure the environment according to Siemens' operational guidelines for Industrial Security (Download: <https://www.siemens.com/cert/operational-guidelines-industrial-security>), and to follow the recommendations in the product manuals.

Additional information on Industrial Security by Siemens can be found at: <https://www.siemens.com/industrialsecurity>

PRODUCT DESCRIPTION

SIMATIC PCS 7 is a distributed control system (DCS) integrating SIMATIC WinCC, SIMATIC Batch, SIMATIC Route Control, OpenPCS7 and other components.

SIMATIC PDM (Process Device Manager) is an universal, manufacturer-independent tool for configuration, parameter assignment, commissioning, diagnostics and maintenance of intelligent process devices (actors, sensors) and automation components (remote I/Os, multiplexer, process control units, compact controller).

SIMATIC STEP 7 V5.X is the classic engineering software to configure and program SIMATIC S7-300/S7-400/C7/WinAC controllers.

STARTER is the drive engineering tool for parameterizing and commissioning.

VULNERABILITY CLASSIFICATION

The vulnerability classification has been performed by using the CVSS scoring system in version 3.1 (CVSS v3.1) (<https://www.first.org/cvss/>). The CVSS environmental score is specific to the customer's environment and will impact the overall CVSS score. The environmental score should therefore be individually defined by the customer to accomplish final scoring.

An additional classification has been performed using the CWE classification, a community-developed list of common software security weaknesses. This serves as a common language and as a baseline for weakness identification, mitigation, and prevention efforts. A detailed list of CWE classes can be found at: <https://cwe.mitre.org/>.

Vulnerability CVE-2021-31894

A directory containing metabytes relevant to devices' configurations has write permissions. An attacker could leverage this vulnerability by changing the content of certain metabytes and subsequently manipulate parameters or behavior of devices that would be later configured by the affected software.

CVSS v3.1 Base Score	7.3
CVSS Vector	CVSS:3.1/AV:L/AC:L/PR:L/UI:N/S:C/C:N/I:H/A:L/E:U/RL:O/RC:C
CWE	CWE-732: Incorrect Permission Assignment for Critical Resource

TERMS OF USE

Siemens Security Advisories are subject to the terms and conditions contained in Siemens' underlying license terms or other applicable agreements previously agreed to with Siemens (hereinafter "License Terms"). To the extent applicable to information, software or documentation made available in or through a Siemens Security Advisory, the Terms of Use of Siemens' Global Website (https://www.siemens.com/terms_of_use, hereinafter "Terms of Use"), in particular Sections 8-10 of the Terms of Use, shall apply additionally. In case of conflicts, the License Terms shall prevail over the Terms of Use.
