

## SSA-780073: Denial-of-Service Vulnerability in PROFINET Devices via DCE-RPC Packets

Publication Date: 2020-02-11  
 Last Update: 2020-09-08  
 Current Version: V1.5  
 CVSS v3.1 Base Score: 7.5

### SUMMARY

Products that include the Siemens PROFINET-IO (PNIO) stack in versions prior V06.00 are potentially affected by a denial-of-service vulnerability when multiple legitimate diagnostic package requests are sent to the DCE-RPC interface.

Siemens has released updates for several affected products and recommends to update to the new versions. Siemens is preparing further updates and recommends specific countermeasures for products where updates are not, or not yet available.

Additionally, Siemens recommends other vendors of PROFINET devices to check if their products have incorporated a vulnerable version of the Siemens PNIO stack as part of the Siemens Development/Evaluation Kits.

### AFFECTED PRODUCTS AND SOLUTION

Affected Product and Versions	Remediation
Development/Evaluation Kits for PROFINET IO: DK Standard Ethernet Controller: All versions	See recommendations from section <a href="#">Workarounds and Mitigations</a>
Development/Evaluation Kits for PROFINET IO: EK-ERTEC 200: All Versions < V4.5	Update to V4.5 Patch 01 <a href="https://support.industry.siemens.com/cs/ww/en/view/109760397/">https://support.industry.siemens.com/cs/ww/en/view/109760397/</a>
Development/Evaluation Kits for PROFINET IO: EK-ERTEC 200P: All Versions < V4.6	Update to V4.6 <a href="https://support.industry.siemens.com/cs/ww/en/view/109765183/">https://support.industry.siemens.com/cs/ww/en/view/109765183/</a>
PROFINET Driver for Controller: All Versions < V2.1	Update to V2.1 Patch 03 <a href="https://support.industry.siemens.com/cs/ww/en/view/109768047/">https://support.industry.siemens.com/cs/ww/en/view/109768047/</a>
RUGGEDCOM RM1224: All versions < V4.3	See SCALANCE M-800 / S615
SCALANCE M-800 / S615: All versions < V4.3	Update to V6.1.2 <a href="https://support.industry.siemens.com/cs/ww/en/view/109772130/">https://support.industry.siemens.com/cs/ww/en/view/109772130/</a>
SCALANCE W700 IEEE 802.11n: All versions <= V6.0.1	Update to V6.4 <a href="https://support.industry.siemens.com/cs/ww/en/view/109773308/">https://support.industry.siemens.com/cs/ww/en/view/109773308/</a>
SCALANCE X-200 switch family (incl. SIPLUS NET variants): All versions	See recommendations from section <a href="#">Workarounds and Mitigations</a>

SCALANCE X-200IRT switch family (incl. SIPLUS NET variants): All Versions < V5.3	Update to V5.4.2 <a href="https://support.industry.siemens.com/cs/ww/en/view/109763309/">https://support.industry.siemens.com/cs/ww/en/view/109763309/</a>
SCALANCE X-300 switch family (incl. X408 and SIPLUS NET variants): All versions	See recommendations from section <a href="#">Workarounds and Mitigations</a>
SCALANCE XB-200, XC-200, XP-200, XF-200BA and XR-300WG: All Versions < V3.0	Update to V4.1 <a href="https://support.industry.siemens.com/cs/ww/en/view/109762982/">https://support.industry.siemens.com/cs/ww/en/view/109762982/</a>
SCALANCE XM-400 switch family: All Versions < V6.0	Update to V6.2.3 <a href="https://support.industry.siemens.com/cs/ww/en/view/109771191/">https://support.industry.siemens.com/cs/ww/en/view/109771191/</a>
SCALANCE XR-500 switch family: All Versions < V6.0	Update to V6.2.3 <a href="https://support.industry.siemens.com/cs/ww/en/view/109771193/">https://support.industry.siemens.com/cs/ww/en/view/109771193/</a>
SIMATIC ET200AL IM 157-1 PN: All versions	See recommendations from section <a href="#">Workarounds and Mitigations</a>
SIMATIC ET200M IM153-4 PN IO HF (incl. SIPLUS variants): All versions	See recommendations from section <a href="#">Workarounds and Mitigations</a>
SIMATIC ET200M IM153-4 PN IO ST (incl. SIPLUS variants): All versions	See recommendations from section <a href="#">Workarounds and Mitigations</a>
SIMATIC ET200MP IM155-5 PN HF (incl. SIPLUS variants): All Versions < V4.2.0	Update to V4.2.0 <a href="https://support.industry.siemens.com/cs/ww/en/view/93012181/">https://support.industry.siemens.com/cs/ww/en/view/93012181/</a>
SIMATIC ET200MP IM155-5 PN ST (incl. SIPLUS variants): All Versions < V4.1.0	Update to V4.1.0 <a href="https://support.industry.siemens.com/cs/ww/en/view/78647504/">https://support.industry.siemens.com/cs/ww/en/view/78647504/</a>
SIMATIC ET200S (incl. SIPLUS variants): All versions	See recommendations from section <a href="#">Workarounds and Mitigations</a>
SIMATIC ET200SP IM155-6 PN Basic (incl. SIPLUS variants): All versions	See recommendations from section <a href="#">Workarounds and Mitigations</a>
SIMATIC ET200SP IM155-6 PN HF (incl. SIPLUS variants): All Versions < V3.3.1	Update to V4.2.2 <a href="https://support.industry.siemens.com/cs/ww/en/view/85624387/">https://support.industry.siemens.com/cs/ww/en/view/85624387/</a>
SIMATIC ET200SP IM155-6 PN ST (incl. SIPLUS variants): All Versions < V4.1.0	Update to V4.1.0 <a href="https://support.industry.siemens.com/cs/ww/en/view/78648144/">https://support.industry.siemens.com/cs/ww/en/view/78648144/</a>

SIMATIC ET200ecoPN (except 6ES7141-6BG00-0BB0, 6ES7141-6BH00-0BB0, 6ES7142-6BG00-0BB0, 6ES7142-6BR00-0BB0, 6ES7143-6BH00-0BB0, 6ES7146-6FF00-0AB0 and 6ES7148-6JD00-0AB0): All versions	See recommendations from section <a href="#">Workarounds and Mitigations</a>
SIMATIC ET200pro, IM 154-3 PN HF: All versions	See recommendations from section <a href="#">Workarounds and Mitigations</a>
SIMATIC ET200pro, IM 154-4 PN HF: All versions	See recommendations from section <a href="#">Workarounds and Mitigations</a>
SIMATIC IPC Support, Package for VxWorks: All versions	See recommendations from section <a href="#">Workarounds and Mitigations</a>
SIMATIC MV400 family: All versions	See recommendations from section <a href="#">Workarounds and Mitigations</a>
SIMATIC NET CP 1616 and CP 1604: All Versions < V2.8	Update to V2.8.1 <a href="https://support.industry.siemens.com/cs/ww/en/view/109768663/">https://support.industry.siemens.com/cs/ww/en/view/109768663/</a>
SIMATIC NET CP 343-1 (incl. SIPLUS variants): All versions	See recommendations from section <a href="#">Workarounds and Mitigations</a>
SIMATIC NET CP 343-1 Advanced (incl. SIPLUS variants): All versions	See recommendations from section <a href="#">Workarounds and Mitigations</a>
SIMATIC NET CP 343-1 ERPC: All versions	See recommendations from section <a href="#">Workarounds and Mitigations</a>
SIMATIC NET CP 343-1 LEAN (incl. SIPLUS variants): All versions	See recommendations from section <a href="#">Workarounds and Mitigations</a>
SIMATIC NET CP 443-1 (incl. SIPLUS variants): All versions	See recommendations from section <a href="#">Workarounds and Mitigations</a>
SIMATIC NET CP 443-1 Advanced (incl. SIPLUS variants): All versions	See recommendations from section <a href="#">Workarounds and Mitigations</a>
SIMATIC NET CP 443-1 OPC UA: All versions	See recommendations from section <a href="#">Workarounds and Mitigations</a>
SIMATIC PN/PN Coupler 6ES7158-3AD01-0XA0 (incl. SIPLUS NET variant): All Versions	See recommendations from section <a href="#">Workarounds and Mitigations</a>
SIMATIC RF180C: All versions	See recommendations from section <a href="#">Workarounds and Mitigations</a>
SIMATIC RF182C: All versions	See recommendations from section <a href="#">Workarounds and Mitigations</a>

SIMATIC RF600 family: All versions < V3	Update to V3.2.1 <a href="https://support.industry.siemens.com/cs/ww/en/view/109768501">https://support.industry.siemens.com/cs/ww/en/view/109768501</a>
SINAMICS DCP: All Versions < V1.3	Update to V1.3 <a href="https://support.industry.siemens.com/cs/ww/en/view/109773826/">https://support.industry.siemens.com/cs/ww/en/view/109773826/</a>
SOFTNET-IE PNIO: All versions	See recommendations from section <a href="#">Workarounds and Mitigations</a>

## **WORKAROUNDS AND MITIGATIONS**

Siemens has identified the following specific workarounds and mitigations that customers can apply to reduce the risk:

- Block incoming DCE-RPC packets (port 34964/udp) from untrusted networks
- For SCALANCE M-800 / S615 and RUGGEDCOM RM1224: Create a firewall rule that blocks the PROFINET Context Manager port (34964/udp)
- Disable PROFINET in products, where PROFINET is optional and not used in your environment
- For SIMATIC RF180C and RF182C: migrate to a successor product within the [SIMATIC RF18xC/CI family, V1.3](#) or later version. For details refer to the [notice of discontinuation](#).

## **GENERAL SECURITY RECOMMENDATIONS**

As a general security measure, Siemens strongly recommends to protect network access to devices with appropriate mechanisms. In order to operate the devices in a protected IT environment, Siemens recommends to configure the environment according to Siemens' operational guidelines for Industrial Security (Download: <https://www.siemens.com/cert/operational-guidelines-industrial-security>), and to follow the recommendations in the product manuals.

Additional information on Industrial Security by Siemens can be found at: <https://www.siemens.com/industrialsecurity>

## **PRODUCT DESCRIPTION**

The SINAMICS converter family is used to control a wide variety of drives, especially in mechanical engineering and plant construction.

Development/Evaluation Kits for PROFINET IO are used to develop compact or modular PROFINET field devices.

PROFINET Driver is a development kit used to develop PROFINET IO controllers.

SCALANCE X switches are used to connect industrial components like Programmable Logic Controllers (PLCs) or Human Machine Interfaces (HMIs).

The SCALANCE M-800 / S615 industrial routers are used for secure remote access to plants via mobile networks, e.g. GPRS or UMTS with the integrated security functions of a firewall for protection against unauthorized access and VPN to protect data transmission.

SCALANCE W products are wireless communication devices used to connect industrial components, like Programmable Logic Controllers (PLCs) or Human Machine Interfaces (HMIs), according to the IEEE 802.11 standard (802.11ac, 802.11a/b/g/h, and/or 802.11n).

SIMATIC NET CP 1616 and CP 1604 are PCI/PCI-104 cards for high-performance connection of field devices to Industrial Ethernet with PROFINET.

Communication Processor (CP) modules of families SIMATIC NET CP 343-1 and CP 443-1 have been designed to enable SIMATIC S7-300/S7-400 CPUs for Ethernet communication.

SIMATIC RF600 Readers are used for the contactless identification of every kind of object, e.g. transport containers, pallets, production goods, or it can be generally used for recording goods in bulk.

SIMATIC RF180C is an RFID communication module for direct connection of SIMATIC identification systems to PROFINET IO/Ethernet. SIMATIC RF180C is superseded by the SIMATIC RF18xC devices (RF185C, RF186C, RF188C).

SIMATIC RF182C is an RFID communication module for direct connection of SIMATIC identification systems to Ethernet/IP. SIMATIC RF182C is superseded by the SIMATIC RF18xC devices (RF185C, RF186C, RF188C).

SIMATIC RF185C, RF186C/CI, and RF188C/CI are communication modules for direct connection of SIMATIC identification systems to PROFINET IO/Ethernet and OPC UA.

The stationary optical readers of the SIMATIC MV400 family are used to reliably capture printed, lasered, drilled, punched and dotpeen codes on a variety of different surfaces.

SIMATIC ET 200 Interface modules for PROFINET IO are used to connect field devices (IO Devices) to controllers (IO Controller) via PROFINET.

With the SIMATIC IPC Support Package for VxWorks, Siemens offers support for industrial computers (SIMATIC IPCs) for the VxWorks real-time operating system.

PN/PN coupler is used for connecting two PROFINET networks.

The SOFTNET product family includes several software applications for connecting programming devices to Industrial Ethernet and PROFIBUS.

SIPLUS extreme products are designed for reliable operation under extreme conditions and are based on SIMATIC, LOGO!, SITOP, SINAMICS, SIMOTION, SCALANCE or other devices. SIPLUS devices use the same firmware as the product they are based on.

## **VULNERABILITY CLASSIFICATION**

The vulnerability classification has been performed by using the CVSS scoring system in version 3.1 (CVSS v3.1) (<https://www.first.org/cvss/>). The CVSS environmental score is specific to the customer's environment and will impact the overall CVSS score. The environmental score should therefore be individually defined by the customer to accomplish final scoring.

An additional classification has been performed using the CWE classification, a community-developed list of common software security weaknesses. This serves as a common language and as a baseline for weakness identification, mitigation, and prevention efforts. A detailed list of CWE classes can be found at: <https://cwe.mitre.org/>.

### Vulnerability CVE-2019-13946

Profinet-IO (PNIO) stack versions prior V06.00 do not properly limit internal resource allocation when multiple legitimate diagnostic package requests are sent to the DCE-RPC interface. This could lead to a denial of service condition due to lack of memory for devices that include a vulnerable version of the stack.

The security vulnerability could be exploited by an attacker with network access to an affected device. Successful exploitation requires no system privileges and no user interaction. An attacker could use the vulnerability to compromise the availability of the device.

CVSS v3.1 Base Score	7.5
CVSS Vector	<a href="#">CVSS:3.1/AV:N/AC:L/PR:N/UI:N/S:U/C:N/I:N/A:H/E:P/RL:O/RC:C</a>
CWE	CWE-400: Uncontrolled Resource Consumption

## **ACKNOWLEDGMENTS**

Siemens thanks the following parties for their efforts:

- Yuval Ardon and Matan Dobrushin from OTORIO for coordinated disclosure
- The Cybersecurity and Infrastructure Security Agency (CISA) for coordination efforts

## **ADDITIONAL INFORMATION**

For further inquiries on security vulnerabilities in Siemens products and solutions, please contact the Siemens ProductCERT:

<https://www.siemens.com/cert/advisories>

## **HISTORY DATA**

V1.0 (2020-02-11):	Publication Date
V1.1 (2020-03-10):	Added affected product SOFTNET-IE PNIO
V1.2 (2020-03-12):	Additional information in section "Workarounds and Mitigations"
V1.3 (2020-08-11):	No changes - this version was never released
V1.4 (2020-08-11):	Added SIMATIC ET200ecoPN product variants (MLFB IDs) that are not affected
V1.5 (2020-09-08):	Informed about successor products for SIMATIC RF180C and RF182C

## **TERMS OF USE**

Siemens Security Advisories are subject to the terms and conditions contained in Siemens' underlying license terms or other applicable agreements previously agreed to with Siemens (hereinafter "License Terms"). To the extent applicable to information, software or documentation made available in or through a Siemens Security Advisory, the Terms of Use of Siemens' Global Website ([https://www.siemens.com/terms\\_of\\_use](https://www.siemens.com/terms_of_use), hereinafter "Terms of Use"), in particular Sections 8-10 of the Terms of Use, shall apply additionally. In case of conflicts, the License Terms shall prevail over the Terms of Use.
